| Hives | ^T melaleuca, ^T peppermint | T: Apply on location. Massage on location. |
| Indigestion | ^I Apeppermint, ^I Aginger | I: Take in capsule. T: Apply on stomach or feet. A: Diffuse. |

T=TOPICAL**I=Internal****A=Aromatic**

Topical application is the process of placing an essential oil directly on the area of concern.

This may include applying or massaging the oil, either diluted or neat (undiluted), on location, adding a few drops of oil to warm bathwater before bathing, or using essential oils in a warm compress.

Internal use is the process of consuming or otherwise internalizing the essential oil into the body. Internal use often includes swallowing 1–10 drops of essential oil inside a capsule or adding 1 drop of essential oil to 1–4 cups of rice milk, almond milk, or water before drinking.

Aromatic use is the process of breathing in the oil through the nasal passage. This can be done by using an essential oil diffuser to dispense oil into the air, by inhaling the essential oil directly from the bottle, or by adding 1–5 drops of essential oil to a humidifier and inhaling the water vapor.

| Condition | Essential Oils | Application |
|---------------------------|---|--|
| Inflammation | ^{TA} frankincense, ^{TA} melaleuca, ^{TA} eucalyptus, ^T Deep Blue | T: Apply on location or back of neck. Massage. A: Diffuse. Inhale water vapors. |
